605
v. 49

Index to Volume XLIX

January-December, 1921

A

Abrasion and Acid-Resisting Alloys ... 975
Abrasives, Finishing Propellers with ... 374
Accentuates Use of Follow Board ... 585
Accountants to Discuss Uniform Methods ... 704
Accounting, Cost. How to Get Back to Normal Quickly-II ... 223
Accounting. How to get Back to Normal Quickly-I ... 176
Accounting Methods in Keeping Costs ... 966
Acid Furnace. Furnace Theory and Practice Disagree ... 365
Acid Furnace, Not Easy to Desulphurize in ... 539
Acid Furnace Reaction, Heat Modifies ... 72
Acid Lined Furnace, Sulphur Reduced in ... 390
Acid or Basic Furnace Lining ... 429
Acid Resisting Alloys, Seeks Better ... 975
Acid Resisting Brass To Resist Pressure ... 655
Acid Resisting Bronze ... 613
Acid Resisting Metal, Cheap ... 974
Adding Fractions ... 988
A. F. A. Announces Meeting in Cleveland ... 910
Air Compressors, Brings Out New Line of ... 869
Air Consumption of Vibrators ... 813
Air Furnace, Apply Powdered Coal to ... 955
Air Furnace Construction and Operation ... 805
Air Furnace. Powdered Coal Applied in Foundry ... 617
Air Furnace Castings. Making Castings for Ice Machines ... 419
Air Furnace Is Fired Automatically ... 515
Air Furnace Practice. Crank Cases Made of Malleable Iron ... 762
Air Furnace, Rolls Are Poured from ... 15
Air Hammer Used to Pulverize Sample ... 411
Air Valve Invented, New ... 456
Air Vibrator Adapted to Operate Riddle ... 993
Ajax Northrup Furnace. High Frequency Inductive Heating ... 573
Alabama Increases Pig Iron Production ... 191
Alkaline Metals in Alloys, Using the ... 855
Allis-Chalmers Mfg. Co.
  Air Furnace Is Fired Automatically ... 515
  Chemist Controls All Iron Mixtures ... 59
  Making Large Bronze Rings ... 831
Alloy
  For Use in Permanent Mold, Aluminum ... 613
  For White Bronze ... 823
  Leaks under Pressure, Aluminum ... 946
  Melting Loss Great, Aluminum ... 520
  Pinholes Due to Metals Constituting ... 567
  Pouring, Aluminum ... 732
  To Resist Moisture ... 112
  Strong Nonarcing ... 775
  With Nickel and Copper, Aluminum Will ... 523
Alloying Nickel and Brass ... 440
Alloys
  Conversion Method for Figuring ... 522
  Decreases Wear, Lead in Bearing ... 58
  Determines Properties of Magnesium ... 821
  Electric Melting Nonferrous ... 468
  Figuring Percentages of Metal in ... 440
  Flux for Aluminum ... 900
  For Making Aluminum Pistons, Proper ... 489
  Nickel and Copper ... 523
  Seeks Better Acid-Resisting ... 975
  Sought, Light ... 823
  To Withstand the Effect of Steam ... 566
  Using the Alkaline Metals in ... 855
Aluminum Additions Affect Cupola Clay ... 533
Aluminum Additions in Yellow Brass, Using ... 239
Aluminum
  Cause of Porous ... 946
  Causes Shrinks ... 566
  Consumption. Analyze Loss in Aluminum Shops-V ... 143
  Data, Bronze and ... 398
  Density of ... 926
  Devise Method for Nickeling ... 701
  Die Castings, Porosity in ... 823
  Eliminating Sponginess from ... 148
  Fans, Rigging For Speed in Blower Work ... 359
  Ford Considers Process for Making ... 688
  For Use in Ice Making Machinery ... 397
  In Brass Mixtures, Counteracting ... 518
  In Cupola Daubing ... 977
  No Flux Needed When Melting ... 279
  Melting. Protects Thermocouple with Wash ... 260
  Retorts for Sulphur, Casting Large ... 857
  Pouring Thin Castings of ... 489
  Softener for ... 319
  Solder for ... 912
  Solders and Fluxes for Use with ... 775
  Specifications for an Alloy of ... 974
  Steel Insert Cast in ... 946
  Surface Defects ... 195
  Thinnest Allowable Sections in ... 946
  To be Dutiable, Graphite and ... 582
  Will Alloy with Nickel and Copper ... 523
Aluminum Pistons, Proper Alloys for Making ... 489
Aluminum Shops, Analyze Loss in ... 16,54,104,143,188, 235
Aluminum Alloy,
  Ductile ... 240
  For Piston Castings ... 148
  For Use in Permanent Mold ... 613
  Leaks under Pressure ... 946
  Manifold Castings Made of ... 357
  Melting Loss Great ... 520
  Pourous ... 732
Aluminum Alloys, Flux for ... 900
Aluminum Alloys Shrink ... 319
Aluminum
  And Sand for Cooking Utensils ... 398
  Annealing ... 739
  As Cool as Possible, Pour ... 733
Aluminum Bronze ... 280
Aluminum Bronze
  Increasing Strength in ... 397
  Melting ... 522
  Notes on ... 801
Aluminum Casting
  Making Crank Cases for Spanish Motors ... 147
  Rigging for Speed in Blower Work ... 359
  Unique ... 577
Aluminum Castings, Remedies Trouble with ... 699
Aluminum Castings. Using Chills to Replace Special Cores ... 280
American Chain Co., York, Pa., Equipment Features Malleable Shop ... 805
American Gear Manufacturers, Again Heads ... 390
American Malleable Castings Association Exhibit ... 287
American Molding Machine Co. Gravity Is Utilized to Roll Flasks ... 571
American Society for Testing Materials Specifies Car Wheel Limit ... 551
Analysis
  Air Hammer Used to Pulverize Sample ... 411
  Of Monel Metal ... 775
  Of Acid-Resisting Alloys ... 975
  Of British Pistons and Piston Rings ... 879
Analyze Loss in Aluminum Shops-II ... 16
Analyze Loss in Aluminum Shops-III ... 54
Analyze Loss in Aluminum Shops-IV ... 104
Analyze Loss in Aluminum Shops-V ... 143
Analyze Loss in Aluminum Shops-VI ... 188
Analyze Loss in Aluminum Shops-VII ... 235
Analyze Defective Casting Losses ... 843
Angle Measurement Method of Testing Malleable ... 897
Anneal Properly, Malleable Iron Will Not ... 854
Anneal Steel with Pulverized Coal ... 29
Annealing
  Aluminum ... 739
  Electricity Applied to ... 366
  Electrically. Electricity Shop's Sole Heat Source ... 87
  Castings Crack During the ... 854
  Inventor Installs His Own Devices for ... 98
  Prevents Piston Castings from Cracking ... 225
  Prevents Pulleys from Cracking ... 53
  Temperature for Gray Iron ... 895
  Tests Cupola Malleable ... 644
  Time for Chilled Wheels Is Shortened ... 556
  Will Soften Gray Iron Castings ... 484
Annealing Furnace .Design Electric ... 720
Annealing Ovens
  Battery Truck Charges ... 84
  Car-Type for Malleable ... 805
  Insulating Brick Lighten Doors of ... 364
  Using Powdered Coal ... 955
Annealing Pots, Molding ... 955
Annealing Pots, Shop Specializes in ... 11
Annealing Powderd Coal ... 955
Anneals Malleable Iron With Oil Fuel ... 323
Antimony Hardens Alloy. Reviews Properties of Gunmetal ... 436
Antimony Not Used in Trolley Wheel Alloy ... 488
Apply Premium System to Foundries ... 611
Arbors, Bell Molds Made of Loam on ... 211
Arc for Nonferrous Furnaces, Smothered ... 363
Arc Welding Problems, Solving Some ... 179
Arcade Malleable Iron Co. From the Foundry to the Speedway ... 459
Arcade Malleable Iron Co. Merges with Baldwin Chain ... 430
Arithmetic, Vocational. Book Review ... 33
Armature Bearing Babbitt ... 240
Artificial Loam Mixtures ... 231
Associations, French Founders Form Important Syndicate ... 483
Augur Castings, Molds for ... 719
Australian Steel Firms Join, English and ... 949
Austrian Cupola Practice ... 530
Auto Castings, Preparing Sand for ... 982
Auto Vehicles Registered ... 898
Automatic Handling Equipment ... 805
Automatic Riddle Co., Develops New Electric Foundry Riddle ... 993
Automatically, Air Furnace Is Fired ... 515
Automobile Castings. British Shop Operates American Machines ... 186
Automobile Castings. Molding Cylinders in an Austrian Shop ... 383
Automobile Crank Cases Made of Malleable Iron ... 762
Automobile Cylinders. How Ford Cylinder Blocks Are Cast ... 751
Automobiles Stressed Too Strongly ... 48
Automotive Castings. Costs Dictate Changes in Molding ... 501

B

Babbitt, Armature Bearing ... 240
Babbittless Bearing ... 112
Barrel, Builds Large Sand-Blast ... 250
Bars in the Cope, Locates ... 745
Basic Furnace Lining, Acid or ... 429
Basic Open Hearth, Reactions in ... 308
Battery Plates, Recovering Lead from Old ... 899
Battery Truck, Builds ... 416
Beardsley & Piper, Chicago. Make Refinements in Sand Throwing Rig ... 52
Bearing Alloys Decreases Wear, Lead in ... 58
Bearing, Babbittless ... 112
Bearing Bronze for Motors. Miscellaneous. Mixtures for Motor Parts ... 357
Bearing Metal
  Alloy for ... 974
  Roll Neck ... 148
Bearings
  Bronze and Aluminum Data ... 398
  Cast Too Cold ... 111
  For Hot Rolls ... 58
  Hot Mill ... 240
  Mixture for ... 774
Belgian Exhibition ... 581
Belgian Foundry Convention, Report of ... 835
Belgians Hold Exhibit ... 539
Belgians Stage Foundry Exhibition ... 837
Bell Molds Made of Loam on Arbors ... 211
Belt from Slipping, Proper Dressing Prevents ... 659
Belt Joint, How to Make a Perfect ... 8
Belt Sander Is Put on Market, New ... 705

Bend Tests, Suggests New Method for Reading ... 969
Bending Test for Malleable, Devise ... 879
Bethlehem Shipbuilding Corp., Quincy, Mass. New England Pattern Shop is Unique ... 127
Bevel Gear Patterns, How to Make ... 34
Bevel Gear Wheel, Bill Enlarges Upon a ... 979
Bevel Gears, Tobacco Reminds Bill of ... 942
Bill Coments on Western Foundry Practice ... 66
Bill Compares Ball Players With Cupola Man ... 486
Bill Discourses Further on Pots ... 846
Bill Enlarges Upon a Bevel Gear Wheel ... 979
Bill Explains It Fully to the Scribe ... 309
Bill Goes Out to Look 'Em Over ... 527
Bill Laments Lack of Consistency ... 781
Bill Learns How Iron Pots Are Made in China ... 814
Bill Learns How to Sweep a Drum ... 149
Bill Makes a Loam for a Cast Iron Pot ... 890
Bill Melts Some Heavy Scrap ... 113
Bill on Exercise and Sand Mixers ... 192
Bill Pays Tribute to Patrick Henry ... 399
Bill Picks up Some Cupola Dope ... 26
Bill Reviews Some Gear Maker's Problems—I ... 604
Bill Reviews Some Gear Maker's Problems—II ... 652
Bill Reviews Some Gear Maker's Problems—III ... 696
Bill Reviews Some Gear Maker's Problems—IV ... 737
Bill Reviews the Sheave Wheel Problem—I ... 226
Bill Reviews the Sheave Problem—II ... 272
Bill Takes a Day Off to Attend the Circus ... 568
Birdsboro Steel Foundry & Machine Co., Birdsboro, Pa. Pennsylvania Firm Extends Plant ... 660
Blacking. Protecting Cores from Phosphor Bronze ... 358
Blast Furnace Castings. Cooling Plates Furnish Bill with a Theme ... 441
Blast Furnace Metal for Castings. How Ford Cylinder Blocks Are Cast ... 751
Blast Pipe. Why Wind Pipe Should Be Set at a Tangent ... 591
Blow Holes, Causes for ... 889
Blow Torch Idea To Furnace, Adapts ... 639
Blower.
Important Factor, Proper Size of ... 243
Serves Foundry for Forty Years ... 582
Work, Rigging for Speed ... 359
Boiler Shell As Small Sized Cup Is, Fit up ... 575
BOOK REVIEW
A. S. T. M. Tentative Standards ... 889
Handbook of Standard Details ... 690
Pattern Making, by Edward M. McCracken ... 532
Protection Our Proper Permanent Policy ... 969
Borings in the Cupola, Wants To Melt Cast Iron ... 651
Boston Navy Yard. Make Marine Cylinders in New Shop ... 1
Box, Machining Qualities Set Standard for Telephone ... 970
Brazing. From the Foundry to the Speedway ... 459
Brakeshoes, Iron for ... 556
Brass Against Iron, Pours ... 613
Brass Alloy, Non-Arcing ... 279
Brass.
Alloying Nickel and ... 440
And Iron Uniting ... 397
Basin Cock Castings, Mixture for ... 440
Brass Balls are Porous ... 974
Brass Bushings, Overcome Troubles in Big ... 398
Brass Casting. Combines Steel and Alloys Casting ... 154
Brass Casting. Pouring Temperature Affects Shrinkage ... 731
Brass Castings.
Are Made, How Small ... 490
Causes for Dirty Spots in ... 857
Color in ... 240
Do Not Stand Pressure Tests ... 656
Rigging for Speed in Blower Work ... 359
Sand for ... 523
Shrinkage Failure in ... 147
Temperature Controlling Factor in 88-10-2 ... 945
That Will Resist Acids ... 732
Tumbling ... 357
Brass Casting Period. Difficulties with Pump Plunger Cores ... 112
Brass Defects Due to Included Dross ... 900
Brass for Conductors ... 112
Brass Formula Kept Secret, Nonshrinkable ... 489
Brass Foundry Construction. Makes Asset of Building Obstacle ... 197
Brass Foundry Practice. Job Shop Adopts Specialty Methods ... 275
Brass Foundry Shows Growth, British ... 5
Brass Furnaces, Method of Operating Oil-Fired ... 22
Brass Furnaces Used for Melting Iron. Melt Gray Iron with Natural Gas ... 139
Brass in Cupolas Melting ... 974
Brass, Melting Loss of ... 823
Brass Melting.
Starting a Small Brass Casting Shop ... 21
Use of Pyrometer in ... 938
Brass Mixture for Use in Spark-Gap Spheres ... 775
Brass Mixtures.
Counteracting Aluminum in ... 318
Physical Properties of ... 857
Brass Molds, Partings for ... 613
Brass Ornamental Castings, Causes of Spots on ... 900
Brass.
Piston Ring ... 195
Preventing Zinc Fumes in Yellow ... 148
Retains Aluminum Oxide ... 613
Revamping Sand Blast for Polishing ... 195
Shakes, Avoiding ... 58
To Resist Pressure, Acid Resisting ... 655
Using Aluminum Additions in Yellow ... 239
Valve Seats Pitted ... 699
Brasses for Rolling Mills ... 857
Brakeshoes Metal for ... 978
Britain, Foundries in ... 330
British Associations Honor Publisher ... 474
British Brass Foundry Shows Growth ... 5
British Cast Iron Research Ass'n., Outline of Purposes of ... 820
British Core Making Practice ... 69
British Cupola Practice ... 231
British Firm Takes Out a French Patent ... 373
British Foundries, Total of ... 820
British Foundry Exhibit Fast Taking Form ... 780
British Foundry Exhibit, Officials for the ... 962
British Foundry Practice.
Cast Iron Research in Great Britain ... 222
Scrap Should Prove Object Lesson ... 262
Suggested Changes in Risers and Heads ... 281
British Foundry Specializes, How a ... 879
British Foundryman's Paper Discussed ... 859
British Foundrymen Hold Meeting ... 817
British Foundrymen Hold Postponed Meeting ... 758
British Industries Strong and Confident ... 820
British Institute Studies Nonferrous Subjects ... 845
British Institution Will Meet in September ... 667
British Malleable Iron Practice Differs ... 325
British Malleable Practice. Experiments on Cupola Malleable ... 135
British Pattern Shop Practice. How to Make Bevel Gear Patterns ... 34
British Piston Ring Co., Ltd. How a British Foundry Specializes ... 879
British Plan Foundry Show Next Year ... 570
British Practice. Molding a Large Planer Machine Bed ... 94
British Practice. Science Is Required in the Workshop ... 160
British Pyrometry Practice, Reviews ... 463
British Research Association Meets ... 531
British Research Body Issues Report ... 978
British Roll Practice. Rolls Are Poured from Air Furnace Iron ... 15
British Shop.
Casts Big Ingot Mold ... 565
Operates American Machines ... 186
Propellers Cast in—I ... 351
Propellers Cast in —II ... 391
Bronze.
Acid Resisting ... 613
Alloy for White ... 823
For Thin Castings ... 656
Hard to Melt in Cupola, Manganese ... 733
Increasing Strength in Aluminum ... 397
Melting Aluminum ... 522
Mixture for Bearings ... 774
Notes on Casting Aluminum ... 801
Propeller Blades Break in Service ... 358
Propellers Cast in British Shop—I ... 351
Propellers Cast in British Shop—II ... 391
Protecting Cores from Phosphor ... 467
Recommended for Long Bushings, Ingot ... 945
Used for Boat Rudders, Manganese ... 280
Bronze and Aluminum Data ... 398
Bronze Bell, Welds Crack in Side of ... 624
Bronze Bushings, Casting Large Manganese ... 899
Bronze Cams, Preventing Fine Cracks in ... 439
Bronze Casting. Hawaiian Plant Makes Heavy Work ... 669
Bronze Castings, Sand for ... 523
Bronze Disk Castings Crack from Stems ... 945
Bronze Friction Bands ... 613
Bronze Liner, Pouring Position Affects ... 572
Bronze Name Plates, Cast ... 357
Bronze Rings Made in Cores, Large ... 831
Bronze Spring Mixture ... 398
Bronze Test Bars, Casting Manganese ... 734
Brown Car Wheel Works, Buffalo. Molds Car Wheels on Jolt Machines ... 709
Brush for Use on Standard Drill, Designs ... 540
Buildings, Foundry, Foundry Design Needs Study ... 345
Builds Foundry To Make Fittings ... 685
Builds Small Cupola Within Larger ... 641
Bulletins, Suggestions for Safety ... 822
Burning a Flange upon a 16-Inch Elbow ... 116
Burns, Safe Shoes Reduce Hot Metal ... 51
Bushings.
Casting Large Manganese Bronze ... 899
Ingot Bronze Recommended for Long ... 945
Overcome Troubles in Big Brass ... 398

C

Calandria Casting. Hawaiian Plant Makes Heavy Work ... 669
Calcium Bronze Alloys ... 856
Cammen Laboratories. Melts Metal for Pipe in the Mold ... 772
Cancellations for Disturbed Business, Blames ... 228
Car, Flat Wheeled Scoop ... 331
Car Journal Bearings. Prevents Lead Separating Out of Alloy ... 319
Car Wheel Limits, Society Specifies ... 551
Car Wheels.
Carbon Main Factor in ... 947
On Jolt Machines, Molds ... 709
Mine. Gravity Is Utilized to Roll Flasks ... 571
Suitable Metal Mix for Mine ... 408
Carbon Main Factor in Car Wheels ... 947
Cast in Aluminum, Steel Insert ... 946
Cast Iron Borings in Cupola, Wants to Melt ... 651
Cast Iron, Electric Furnace Melting Recommended ... 484
Cast Iron Pipe Industry for 1920, Census of ... 821
Cast Iron Research Association Meets, British ... 531
Cast Iron Research Ass'n., Outline of Purposes of British ... 802
Cast Iron Wheels, Studies Failures of ... 602
Cast Steel, Study Impact Tests on ... 512
Casting.
Aluminum Bronze, Notes on ... 801
Brass Around Iron ... 567
Centrifugal. Melts Metal for Pipe in the Mold ... 772
For Pump Plunger Shows Porosity ... 567
For Telephone Box ... 970
Imbedding a Steel Rod in an Iron ... 854
Large Aluminum Retorts for Sulphur ... 857
Large Manganese Bronze Bushings ... 899
Magnesium ... 732
Manganese Bronze Test Bars ... 734
Pour Aluminum as Cool as Possible in ... 733
Used as Stove Plate, Find Old ... 949
Casting Consumption. Automobile Stressed Too Strongly ... 48
Casting Losses, Analyzes Defective ... 843
Casting Losses. Analyze Loss in Aluminum Shops ... 104
Casting Metal, Problems Involved in ... 926
Casting Temperature for Metals ... 926
Castings.
Bronze For Thin ... 656
Checking Troubles in Steel ... 475
Crack During the Annealing Operation ... 854
Crack from Stems, Bronze Disk ... 945

For Clay Machinery 719
For Ice Machines, Making 419
Heat Treating Improves 797
Hot Sand in Flask Causes Porous Brass 900
How to Make Sash Weight 592
Made in Green Sand, Steel 552
Making Water Turbine—I 873
Making Water Turbine—II 920
Piston and Piston Rings 879
Porosity in Aluminum Die 823
Preparing Sand for Auto 982
Produce Detail in 225
Remedies Trouble with Aluminum 699
Research Improves Malleable 761
Castings Market, Oil Wells Create a 545
Cast Iron. Amounts Too Small for Cupola 225
Cast Iron. Elements in Iron Control Mixtures 64
Cast Iron Research in Great Britian 222
Cast Steel Tools Direct From Furnace 332
Cement is Not a Suitable Facing, Portland 742
Census of the Cast Iron Pipe Industry 821
Centrifugal Casting. Melts Metal for Pipe in the Mold 772
Centrifugally Cast Pistons 879
Chain Belt Co., Places Cupola on Weight Schedule 519
Chains and Slings for Foundry Use 615
Chaplet Can Be Tightened Down with a Bolt 618
Chaplets, Nails Sometimes Set to Support 989
Charges Before the Heat, Weigh All 377
Charging Cupola Requires Weight Schedule 519
Charging Cupolas at McMyler-Interstate Foundry 963
Charging Machine Belt to Conserve Lining 828
Charging Truck Made in Two Sizes, Pneumatic 541
Chart Assists Salesman in Setting Prices 62
Chart Shows the Percentage of Scrap 661
Checking Troubles in Steel Casting 475
Chicago Steel Foundry Co. Completes Revision of Foundry 426
Chill, Iron Wavy against 940
Chilled Iron Wheels, Carbon Main Factor in 947
Chilled Roll Molds Cause Explosion, Small 907
Chilled Rolls. How Steel Mill Rolls Are Made—II 631
Chilled Wheels, Shorten Annealing Time for 556
Chills. How Steel Mill Rolls Are Made—I 595
Chills to Replace Special Cores, Using 280
China, Bill Learns How Iron Pots Are Made In 814
Chisels Made from Old Files 906
Chinese Foundry Practice. Tells Foundrymen About Chinese Manufacture 205
Chrome-nickel Castings 290
Chronology of Iron and Steel, Book Review 234
Circular Crane, Improved 541
Clamp, A Handy Spring 863
Clay Affects Iron, Cupola Daubing 533
Clay Machinery Press Problems 719
Clay Mixtures for Cupola Daubing 977
Cleaning Equipment for Malleable Castings 805
Cleaning Methods. How Small Brass Castings Are Made 490
Cleveland, A. F. A. Announces Meeting in 910
Coal, Anneal Steel with Pulverized 29
Coal Applied in Foundry, Powdered 617
Coal Fired Air Furnace 515
Coal for Malleable Ovens, Powdered 805
Coal to Air Furnace, Apply Powdered 955
Coal for Annealing Ovens, Powdered 955
Coke and Oil Used Together in Austrian Cupola Practice 530
Collector Doubles Capacity of Mill, Dust 828
Color in Brass Castings 240
Coloring Caused by Sand, Brass 523
Committee Organized to Study Sand 977
Composition Causes Rim in Malleable Iron 941
Composition of Castings 556
Composition Mounts, Making a Pair of 115
Compressor Casting Leaks 407
Compressors, Brings Out New Line of Air 869
Computing Weight on Copes in Heavy Casting 847
Construction of Work for Manufacturing Firm 963
Consumption of Aluminum. Analyze Loss in Aluminum Shops—V 143
Consumption of Castings. Automobile Stressed Too Strongly 48
Continuous Pouring. Molds Car Wheels on Jolt Machines 709
Conversion Method for Figuring Alloys 522
Converter Practice in Clay Machinery Foundry 719
Converter Process, Quality Secured from 218
Conveying Equipment. How Ford Cylinder Blocks Are Cast 751
Conveying Powdered Coal 955
Conveyor Systems. Molds Car Wheels on Jolt Machines 709
Cooking Utensils, Aluminum and Sand for 398
Cooling Plates Furnish Bill with a Theme 441
Cope, Estimates Pressure on 847
Copper.
Aluminum Will Alloy with Nickel and 523
Calcium Alloys 855
In a Cupola, Melting 889
Using Silicon 195
Copper Alloy, Extract Lead from a 656
Copper Alloys, Nickel and 523
Copper Castings Won't Machine Well 733
Copper Ingot is Pronounced Harmless, Acid in 56
Copper, Zinc Alloys. Yellow Zinc Scrap Is Useful in Foundry 356
Coppus Engineering & Equipment Co., Worcester, Mass.
Rigging for Speed in Blower Work 359
Core Box Made from Casting, Pattern and 906
Core Construction for Furnaces 915
Core Machine Used in British Piston Practice 879
Core Making Machines. How Soil Pipe Castings Are Made 43
Core Making. Molding Cylinders in an Austrian Shop 383
Core Making Practice in Britain 69
Core Method of Cylinder Molding 501
Core, Mold Tractor Link with Green Sand 896
Core, Novel Method of Sweeping an Elbow 74
Core Oil, Comments on Qualities Sought 564
Core Oils, Tests Show Quality of 447
Core Oven Solves Warping Problem, Novel 77
Core Oven Temperature Control by Pyrometer 938
Core Ovens.
Apply Powdered Coal to 955
Builds New 706
Electricity Applied To 659
Electric. Electricity Shop's Sole Heat Source 87
Heated by Steam 955
How Gas Can Be Used in 657
Core Required to Give Pressure Head, Deep 319
Core Sand.
Cleaned from Small Cavities 940
From Aluminum Spools, Removing 732
Mixture for Tests, Makes Strong 840
Cores.
Cause Blow Holes 889
Difficulties with Pump Plunger 112
For Manganese Bronze Bushings 899
For Runners for Water Turbines, Making 920
For Water Turbine Castings 873
From Phosphor Bronze, Protecting 358
From Phosphor Bronze, Protecting 467
Green Sand. Analyze Loss in Aluminum Shops—VI 188
Large Bronze Rings Made in 831
Leave Rough Surface on Castings, Piston 640
Stick to Drier 161
Stick to Dryers 314
Corebox Gives Chance To Show Ingenuity 662
Corrosion Resistant. Aluminum for Use in Ice Making Machinery 397
Cost Analysis. How to Get Back to Normal Quickly—I 176
Cost Analysis. How to Get Back to Normal Quickly—II 223
Cost Books, Issues List of 325
Cost Data Essential to Foundries 966
Cost of Fuel in Cupola, Oil Lowers 530
Cost of Iron Mixture with Scrap, Cuts 511
Cost of Synthetic Gray Iron Low 242
Cost System, Advises Use of Uniform 524
Costs, of Air Furnace Oil and Coal Fired Comparative. Making Castings for Ice Machines 419
Costs.
Dictate Changes in Molding 501
For National Founders Urges Uniform 941
Makes Comparison of Melting 315
Pointers on Gas-Fired Crucible Melting 270
Transportation Governs Iron 133
Cracks in Bronze Cams, Preventing Fine 439
Crane.
Adopt Safety Devices for Foundry 379
Cage Has Safety Features 416
Crawl-Type 331
For Handling Material, Build Portable 167
For Light Work, Designs Locomotive 83
Has Gas Engine Power, Crawling Tread 787
Improved Circular 541
Light Type Hand 208
Motor, Develops 82
Cranes for Handling, Overhead 805
Crankcases for Spanish Motors, Making 147
Crankcases Made of Malleable Iron 762
Crawling Tread Crane Has Gas Engine Power 787
Crucible Does Not Often Pay, Melting Iron in 555
Crucible Furnace Builds New Pit-Type 539
Crucible Manufacture. Protest Proposed Duty on Plumbago 241
Crucible Melting. British Brass Foundry Shows Growth 5
Crucible Melting, Pointers on Gas-Fired 270
Crucible Quality, War Conditions Affected 208
Crucible Steel, Melting 724
Cupola, Amounts Too Small for 225
Cupola Charging Machine, Belt to Conserve Lining 828
Cupola Daubed with Sand and Fireclay 556
Cupola Daubing Clay Affects Iron 533
Cupola Daubing Is Responsible 977
Cupola Dope, Bill Picks up Some 26
Cupola.
Features Portable 539
Fit Up Boiler Shell As Small Sized 575
How to Secure White Hot Iron from 556
Is Feasible, Small 467
Is Not Adapted for Small Melts 408
